Crawler Dozer

D39EXi-24
D39PXi-24

Tier 4 Final Engine

NET HORSEPOWER
105 HP @ 2200 rpm
78 kW @ 2200 rpm

OPERATING WEIGHT
D39EXi-24: 21,848 lb 9910 kg
D39PXi-24: 22,774 lb 10330 kg

BLADE CAPACITY
2.89–3.14 yd³
2.21–2.40 m³

Photo may include optional equipment.

intelligent MACHINE CONTROL
Next Generation Intelligence

No Cables
No coiled cables between machine and blade.

No Climbing
GNSS antenna and mast removed from blade.

No Connections
No daily connections required between machine and blade.

Innovative
Automated blade control from rough dozing to finish grade.

Integrated
Standard factory installed machine control system.

Intelligent
New dozing mode, load control performance features.

---

NET HORSEPOWER
105 HP @ 2200 rpm
78 kW @ 2200 rpm

OPERATING WEIGHT
D39EXi-24: 21,848 lb 9910 kg
D39PXi-24: 22,774 lb 10330 kg

BLADE CAPACITY
2.89–3.14 yd³
2.21–2.40 m³

Photo may include optional equipment.
Efficient Cooling System:
- Electronically controlled, hydraulically-driven fan is manually reversible
- Radiator cover with gas assisted lift cylinders, opens easily for cleaning
- Side-by-side coolers with increased cooling capacity

Integrated ROPS cab features:
- Large, quiet, and pressurized cab
- Excellent visibility with integrated ROPS structure
- Heated air-ride seat with high capacity suspension (standard)
- Standard aux jack and (2) 12V power convertors

Self-adjusting idler support provides constant and even idler tension, reducing vibration and increasing undercarriage life.

Parallel Link Undercarriage System (PLUS) provides up to double the wear life and lowers repair and maintenance costs.

New Triple Labyrinth Final Drive provides additional protection for the final drive floating seals.

Power Angle Tilt (PAT) dozer with manually adjustable blade pitch increases productivity in a variety of applications.

Complete operator blade control:
- Palm Command Control System (PCCS)
- Electronic Proportional Control (EPC)
- Adjustable Quick shift and Variable shift modes
- Blade angle switch
- New three blade control settings
- Multiple Operator memory storage

Efficient Hydrostatic Transmission with electronic control:
- Customizable quick shift (3 speed) settings for the operator
- Variable speed selection (20 speeds)
- Low speed matching technology (larger displacement pumps/efficient engine speed)
- HST control system can reduce fuel consumption

Factory Installed Machine Control Components
Machine control components are factory installed and designed as an integral part of the base machine for improved durability.

Komatsu Quality
Machine control components and system validated to Komatsu’s rigorous quality & durability standards.

Industry Standard Compatibility
Machine control system makes use of common industry design data file norms and supports typical base station communication.

Simple Operator Interface
Simple touch screen control box with multi-color customizable display.

3D GNSS Machine Control (Standard)
All on-machine components are standard including control box, GNSS receiver/radio, GNSS antenna, and enhanced inertial measuring unit sensor.

Finish Grade Performance
Enhanced sensor package and intelligent logic provides for finish grade accuracy in an integrated system without traditional blade mounted sensors.

Enhanced Inertial Measuring Unit (IMU+)
Chassis mounted enhanced inertial measuring unit (IMU+) and intelligent logic provides for finish grade accuracy without blade mounted sensors.

Cab Top GNSS Antenna
Load control intelligence controls blade elevation to improve productivity and minimize track slip by adjusting blade load. 1.0’ from grade or 0.1’ from grade – you can run in auto mode.

Intelligent Dozing Mode Settings
Operators are able to select between 4 distinct machine control operating modes to optimize performance to the application whether cutting, spreading, or other.

Operator Selectable Load Settings
Machine control load settings can be adjusted between presets to tailor response to material conditions.

SAA4D95LE-7 variable flow turbocharged and aftercooled 3.26 liter diesel engine provides excellent fuel economy. This engine is EPA Tier 4 Final emissions certified.

Variable Flow Turbocharger uses a simple valve to provide optimum air flow under all speed and load conditions.

Komatsu Diesel Oxidation Catalyst (KDOC) and Selective Catalytic Reduction (SCR) systems reduce particulate matter and NOx using passive regeneration 100% of the time. No active or manual regeneration is required.

New Komatsu Auto Idle Shutdown helps reduce excessive idle time.
The D39EXI/PXI-24 features a 3D Global Navigation Satellite System (GNSS*) machine control system which automatically controls the blade elevation and tilt per target design data. Not only can the automatic machine control features be used for finish grading but also for heavy (rough) dozing. Loading of the blade at the start of the cut is controlled per set parameters. During the pass, if the load on the blade increases during heavy dozing operation, the blade is automatically raised to control the load and minimize shoe slip to ensure efficient dozing. When the blade approaches the target design surface, the blade will follow it for accurate finish grading.

* GNSS is the general term for satellite positioning systems such as GPS and GLONASS.

1. Blade moves to target surface until load reaches a preset level.
2. The blade automatically raises to minimize track slip.
3. Should the load decrease, blade will lower to re-load blade to an optimum level.

**Automatic Blade Control, Ranging from Heavy Dozing to Finish Grading**

**Operator Selectable Dozing Mode, Blade Load Settings**

**Dozing mode settings**
Optimize machine performance for the given operation type.

- **Cutting and carry**
  - Long, shallow cuts
- **Cutting**
  - Front to back dozing
- **Spreading**
  - Spreading a pile of material
- **Simple grading**
  - Severe grade breaks, transitions

**Blade load mode settings**
Tailor blade loads to material conditions.

- **Light**
  - Low traction application, low blade load due to material characteristics
- **Normal**
  - Typical operation
- **Heavy**
  - High traction application, high blade load due to material characteristics

**Function switches**

- **Cut/fill offset switch**
The cut/fill offset setting can be quickly adjusted by hand.
- **Back grade mode switch**
The back grade mode can be quickly turned on or off.

**Auto/manual switch**
Multiple passes, forward and reverse, can be made with automatics activated the entire time.

**As-built Mapping Display for Checking Construction Progress**
Cab top GNSS antenna provides for accurate as-built surface data collection by measuring actual elevations as machine continuously tracks in operation.

Cut/fill offset switch
Back grade mode switch

![Cab top GNSS antenna](image)
Machine Control System for High-performance, High-quality and High-durability

**GNSS antenna**
Mounted to top of cab to minimize damage – not on the blade.

**Enhanced inertial measuring unit (IMU+)**
Chassis mounted IMU and intelligent logic enables accurate grading performance without blade mounted sensors.

**Control box**
Easy to use touchscreen display features bright graphics and customizable views. Mounting allows viewing angle to be adjusted per operator preference.

**Stroke sensing hydraulic cylinders**
Robust stroke sensing hydraulic cylinders employ proven Komatsu sensor technologies for accurate finish grade performance.

Factory Installed Machine Control System For Quality, Durability
Machine control system components are factory installed and designed as an integral part of the machine.
PERFORMANCE FEATURES

KOMATSU NEW ENGINE TECHNOLOGIES

Komatsu’s New Emission Regulations-compliant Engine
New regulations effective in 2014 require the reduction of NOx emissions. In addition to refining the U.S. EPA Tier 4 Interim technologies, Komatsu developed a new Selective Catalytic Reduction (SCR) device in-house.

1. Komatsu Diesel Oxidation Catalyst (KDOC)
2. Variable flow turbocharger
3. Komastu Closed Crankcase Ventilation (KCCV)
4. SCR

Technologies Applied to New Engine

Water cooled variable flow turbocharger
A newly designed variable flow turbocharger features simple and reliable technology that varies the intake airflow. Exhaust turbine wheel speed is controlled by a flow control valve that enables delivery of an optimal volume of air to the engine combustion chamber under all speed and load conditions. The result is cleaner exhaust gas while maintaining power and performance.

Heavy-duty aftertreatment system
This new system consists of a KDOC and a SCR. The SCR NOx reduction system injects the correct amount of Diesel Exhaust Fluid (DEF) at the proper rate, thereby decomposing NOx into non-toxic water (H2O) and nitrogen gas (N2).

Cooled Exhaust Gas Recirculation (EGR)
Cooled EGR, a technology well-proven in existing Komatsu engines, reduces NOx emissions. These components ensure reliable performance during the demanding work conditions of construction equipment.

Komatsu Closed Crankcase Ventilation (KCCV)
Crankcase emissions (Blowby gas) are passed through a KCCV filter. The KCCV filter traps oil mist which is returned back to the crankcase while the gas, which is almost oil mist free, is fed back to the air intake.
Heavy-duty High Pressure Common Rail (HPCR) fuel injection system
The system is designed to achieve an optimal injection of high-pressure fuel by means of computerized control, thereby bringing close to complete combustion to reduce Particulate Matter (PM) emissions. While this technology is already used in current engines, the new system uses higher-pressure fuel injection, thereby reducing both PM emissions and fuel consumption over the entire engine power range.

Advanced electronic control system
The electronic control system performs high-speed processing of all signals from sensors installed in the vehicle and engine. This ensures total control of the equipment under all conditions. Engine condition information is displayed via an on-board network on the monitor inside the cab. Furthermore, KOMTRAX helps customers use this information to keep up with maintenance needs.

Redesigned combustion chamber at top of piston
The combustion chamber at the top of the piston has a new shape designed to improve combustion and further reduce NOx, PM, fuel consumption and noise.

Auto Idle Shutdown Function
Komatsu auto idle shutdown automatically shuts the engine down after idling for a set period of time to reduce unnecessary fuel consumption and exhaust emissions. The amount of time before the engine is shutdown can be easily programmed from 5 to 60 minutes.
**PRODUCTIVITY & FUEL ECONOMY FEATURES**

**HYDROSTATIC TRANSMISSION (HST) CONTROL SYSTEM**

**HST Control System**
The HST controller monitors engine output and work load. It controls HST pump and motor displacement to provide the optimum speed and drawbar pull. Full power to both tracks during turns or counter-rotation makes the D39EXi/PXi-24 extremely maneuverable.

**Fuel Efficiency**
The efficient HST control system can reduce fuel consumption.

**Fuel consumption reduced by up to 5%**
Compared with D39EXi/PXi-23 in P mode
Based on typical work pattern collected via KOMTRAX

**Hydraulically Driven Cooling Fan**
The engine cooling fan's speed is electronically controlled. Fan speed depends on engine coolant and oil temperatures. The fan will only rotate as fast as is necessary to adequately cool the machine's fluid. This system increases fuel efficiency, reduces operating noise levels and requires less horsepower than a belt-driven fan.

**Long Track-On-Ground and Oscillating Track Frame**
Long machine track-on-ground and oscillating track frames improve stability and grading/dozing performance.

**Selectable Working Mode**
P mode is the mode designed for powerful operation and maximum production. E mode is designed for general dozing applications, providing adequate speed and power, while saving energy. For fuel reduction and energy savings, the monitor panel allows the operator to easily switch between working modes, depending on working conditions.

**P mode (Power mode)**
With P mode, the engine outputs its full power, allowing the machine to perform work requiring large production, heavy-load, and uphill work.

**E mode (Economy mode)**
With E mode, the engine outputs enough power for the work without delivering unnecessary power. This mode enables energy saving operation and is ideal on hard or rough surfaces that often cause shoe slip and work not requiring as much power, such as downhill dozing, leveling and light-load work.
PAT DOZER

PAT Dozer with Adjustable Pitch
A power angle power tilt dozer blade with adjustable blade pitch system is available on the D39EXi/PXi-24. The hydraulic blade tilt and angling function expands versatility and productivity in a variety of applications and manually adjustable blade pitch.

Unrivaled Blade Visibility
The D39EXi/PXi-24 incorporates Komatsu’s super-slant nose design. Komatsu’s innovative design provides excellent blade visibility for improved machine control and increased efficiency and productivity.
CONTROL FEATURES

Palm Command Control System (PCCS) Levers
Komatsu’s ergonomically designed PCCS handles create an operating environment with complete operator control.

PCCS
The low-effort PCCS joystick controls all directional movements, including machine travel speed as well as counter-rotation.

Electronic controlled hydraulic system
Electronic controlled palm commanded joystick provides precise blade control. New blade angling switch operation provides easier and predictable blade control.

HST with Electronic Control
The D39EXi/PXi-24 is equipped with Komatsu-designed HST that allows for Quick-Shift or variable speed selection. The HST consists of dual-path closed-circuits, with two variable displacement piston pumps and two variable displacement travel motors. Hydrostatic steering eliminates steering clutches and brakes, providing smooth, powerful turns. Fully electronic control provides complete automatic shifting and enables smooth control. Engine speed is controlled using an electronic fuel control dial.

One-Pedal Design (Decelerator/Brake Pedal) Controls Speed, During Operation
Machine operation is simple because brake function has been integrated into the decelerator pedal. Machine travel speed can be controlled using one pedal. The pedal function can be changed by a mode selector switch.

Decelerator mode: The pedal modulates engine rpms and vehicle travel speed. It can be used for all applications.

Brake mode: The pedal modulates vehicle travel speed while maintaining high-engine speed. This mode can be helpful to maintain work-equipment speed, while using the brake function.
**Integrated ROPS (ISO 3471) Cab**
The D39EXi/PXi-24 has an integrated ROPS (ISO 3471) cab. High rigidity and superb sealing performance sharply reduce noise and vibration for the operator and discourage dust from entering the cab. In addition, side visibility is increased because external ROPS (ISO 3471) structure and posts are not required.

**Comfortable Ride with Cab Damper Mounting**
The D39EXi/PXi-24’s cab mount uses a cab damper system that provides excellent shock and vibration absorption which conventional mounting systems are unable to match. The silicon-oil-filled cab damper mount helps to isolate the cab from the machine body, suppressing vibration and providing a quiet, comfortable operating environment.

**Auxiliary Input Jack & Two DC12 Volt Electrical Outlets**
By connecting an auxiliary device to this plug input, the operator can play audio from a mobile device through the machine’s sound system. Two DC12 volt electrical outlets can be used as a power source for radio equipment or others.

**Comfortable Ride with Heated Operator Seat**
The operator seat has adjustable lumbar support, tilt and an electric heater. It is easy to adjust to the operator’s shape and comfortable operation is possible in a variety of conditions. Also, the seat heat makes it possible to work comfortably in the winter.

**Rear view monitor system**
On the large LCD color monitor, the operator can view, through one camera, areas directly behind the machine. This camera can be synchronized with reverse operation.

**Secondary engine shutdown switch**
A new secondary switch has been added at the side of the front console to shut down the engine.
Excellent Reliability & Durability
Parallel Link Undercarriage System (PLUS)
Komatsu’s PLUS rotating bush design provides less downtime, longer wear, and with up to 40% lower undercarriage maintenance costs. Rotating bushings eliminate the cost and downtime for bushing turns, and strengthened rollers and links increase wear life up to two times. With PLUS, individual links can be replaced with common track tools.

Modular design
One of the design goals behind the creation of the D39EXi/PXi-24 was to manufacture a more durable machine. This was achieved by reducing component complexity and using a strong modular design for increased serviceability and durability.

Self-adjusting idler support
The self-adjusting idler support provides constant and even tension on idler guide plates, reducing noise and vibration and increasing undercarriage life.

Easy Maintenance
Planned maintenance and daily checks are the only way to ensure long service life from equipment. That’s why Komatsu designed the D39EXi/PXi-24 with conveniently located maintenance points to make necessary inspections and maintenance quick and easy.

Rear, hydraulically-driven, swing-up fan
The D39EXi/PXi-24 utilizes a swing-up fan with a gas strut-assisted lift system to provide easy access to the (side-by-side) radiator, oil cooler and charge air cooler. The hydraulic fan has a cleaning mode which enables the fan to rotate in the reverse direction to help clear off objects that are restricting air flow.
Large Multi-Lingual High Resolution LCD Monitor
A large, user-friendly color monitor provides easy-to-understand information for the operator. Excellent screen visibility is achieved with a high resolution LCD monitor that is easy to read at various angles and lighting conditions. Simple and easy-to-operate switches and function keys facilitate multi-function operations. The monitor displays data in 26 languages.

Energy Saving Operation
Ecology guidance
In order to support efficient operation, the following four messages are displayed for fuel saving operation. These can be displayed by the operator, if desired.
1) Avoid Excessive Engine Idling
2) Use Economy Mode to Save Fuel
3) Avoid Hydraulic Relief Pressure
4) Avoid Over Load

Ecology gauge
To help the operator to perform in an environmentally friendly way and minimize energy consumption, an easy-to-read “Ecology gauge” is displayed on the left of the multi-monitor screen.

Fuel consumption display
Average fuel consumption during the day is displayed and updated every 10 seconds.

Ecological Operation Report for Assistance
KOMTRAX is Komatsu’s remote equipment and fleet monitoring system. Wireless technology and a secure web-based application offer the information needed to make the best possible operation and management decisions. From location, actual hours worked and fuel consumption, to maintenance monitoring, abnormality codes and load frequency, operators receive reports that are simple to read and understand. The new D39EXi/PXi-24 adds the following new information for fuel consumption reduction.
- Guidance to improve fuel consumption
- Ecological operation report.
- Operating hours by operation mode (E or P mode)
- Service information for U.S. EPA Tier 4 Final (regeneration information)
KOMATSU PARTS & SERVICE SUPPORT

KOMATSU CARE®

Program Includes:
*The D39EXi/PXi-24 comes standard with complimentary factory scheduled maintenance for the first 3 years or 2,000 Hours, whichever comes first.

Planned Maintenance Intervals at:
500/1000/1500/2000 hour intervals. (250 hr. initial interval for some products) Complimentary Maintenance Interval includes: Replacement of Oils & Fluid Filters with genuine Komatsu Parts, 50-Point inspection, Komatsu Oil & Wear Analysis Sampling (KOWA) / Travel & Mileage (distance set by distributor; additional charges may apply) Komatsu CARE services are available from every Komatsu Distributor in the U.S. and Canada.

Benefits of Using Komatsu CARE
- Assurance of Proper Maintenance with OEM Parts & Service
- Increased Uptime & Efficiency
- Factory Certified Technicians Performing Work
- Cost of Ownership Savings
- Transferable Upon Resale

Complimentary SCR System Maintenance
The D39EXi/PXi-24 also includes 2 factory recommended services of the Selective Catalytic Reduction (SCR) Diesel exhaust fluid (DEF) system during the first 5 years—no hour limit including:
- Factory recommended DEF tank flush and strainer cleaning at 4,500 hours and 9,000 hours

Komatsu CARE® – Advantage Extended Coverage
- Extended Coverage can provide peace of mind by protecting customers from unplanned expenses that effect cash flow
- Purchasing extended coverage locks-in the cost of covered parts and labor for the coverage period and helps turn these into fixed costs

Komatsu Parts Support
- 24/7/365 to fulfill your parts needs
- 9 parts Distribution Centers strategically located across the U.S. and Canada
- Distributor network of more than 300 locations across U.S. and Canada to serve you
- Online part ordering through Komatsu eParts
- Remanufactured components with same-as-new warranties at a significant cost reduction

Komatsu Oil and Wear Analysis (KOWA)
- KOWA detects fuel dilution, coolant leaks, and measures wear metals
- Proactively maintain your equipment
- Maximize availability and performance
- Can identify potential problems before they lead to major repairs
- Reduce life cycle cost by extending component life

* Some exclusions apply. Please contact your Komatsu distributor for specific program details.
KOMTRAX EQUIPMENT MONITORING

**WHAT**
- KOMTRAX is Komatsu’s remote equipment monitoring and management system
- KOMTRAX continuously monitors and records machine health and operational data
- Information such as fuel consumption, utilization, and a detailed history lowering owning and operating cost
- KOMTRAX is standard equipment on all Komatsu construction products

**WHEN**
- Know when your machines are running or idling and make decisions that will improve your fleet utilization
- Detailed movement records ensure you know when and where your equipment is moved
- Up to date records allow you to know when maintenance is due and help you plan for future maintenance needs

**WHERE**
- KOMTRAX data can be accessed virtually anywhere through your computer, the web or your smart phone
- Automatic alerts keep fleet managers up to date on the latest machine notifications

**WHY**
- Knowledge is power - make informed decisions to manage your fleet better
- Knowing your idle time and fuel consumption will help maximize your machine efficiency
- Take control of your equipment - any time, anywhere

KOMTRAX®
For construction and compact equipment.

KOMTRAX Plus®
For production and mining class machines.
**SPECIFICATIONS**

**ENGINE**

Model: Komatsu SAA4D95LE-7
Type: 4-cycle, watercooled, direct injection
Aspiration: Variable flow, turbocharged, air-to-air aftercooled

Number of cylinders: 4
Bore x stroke: 95 mm x 115 mm
Piston displacement: 3.75" x 4.52"
Governor: All-speed, electronic

**HYDROSTATIC TRANSMISSION**

Dual-path, hydrostatic transmission provides infinite speed changes up to 5.3 km/h / 8.5 mph. The variable capacity travel motors allow the operator to select the optimum speed to match specific jobs. Travel control lock lever and neutral switch.

<table>
<thead>
<tr>
<th>Travel speed (variable mode)</th>

</tr>
</tbody>
</table>

*Quick shift speeds are adjustable in the monitor.

**STEERING SYSTEM**

Palm Command Control System (PCCS) joystick control for all directional movements. Pushing the joystick forward results in forward machine travel, while pulling it rearward reverses the machine. Simply tilt the joystick to the left or right to make a turn. Tiling the joystick fully to the left or right activates counter-rotation.

Hydrostatic Transmission (HST) provides smooth powerful turns. Fully electronic control enables smooth control that can be adjusted in the monitor. The PCCS utilizes shift buttons to increase and decrease speed. Minimum turning radius:

- **D39EXi-24** 2.2 m 87”
- **D39PXi-24** 2.4 m 94”

*As measured by track marks on the ground at pivot turn.

**UNDERCARRIAGE**

Suspension: Rigid type
Track roller frame: Monocoque, large section, durable construction
Rollers & idlers: Lubricated track rollers
Sealed & lubricated track...Track tension easily adjusted w/grease gun

Blade capacities are based on the SAE recommended practice J1265. Use of high-tensile-strength steel in moldboard for strengthened blade construction.

* Including hitch
**STANDARD EQUIPMENT FOR BASE MACHINE**

- Accumulator for Electric Proportional Control (EPC)
- Air cleaner, dry, double element type with caution lamp on monitor
- Air conditioner (A/C)
- Air inlet
- Alternate, 24 V/85 A
- Back-up alarm
- Batteries, large capacity 24 V/92 Ah
- Cab accessories
  - 12 V x 2 power supply
  - Cup holder
  - Rear view mirror
  - Rear view monitor system
- Crankcase guard and underguard
- Decelerator/brake pedal (Single pedal)
- Electronically controlled Hydrostatic Transmission (HST) with quick-shift and variable speed settings
- Electronic monitor panel with on-board diagnostics
- Engine hood and side panels
- Engine, KOMATSU SAA4D95LE-7, gross output of 80 kW 107 HP, direct injection, water-cooled turbocharged, air-to-air aftercooler, cooled EGR, EPA Tier 4 Final and EU Stage 4 emissions certified
- Fan, hydraulic driven, electronic control
- Filter cap locks and cover locks
- Foot rest, high mounted
- Fuel pre-filter (10 micron) and fuel filter (2 micron)
- Grease gun holder
- High altitude arrangement (No fuel adjustment up to 2300 m)
- Horn
- Hydraulics for PAT dozer
- Intake pipe with precleaner
- Large high-resolution LCD
- Lunch box holder
- Marks and plates, English
- New Operator Identification System
- Palm Command Control System (PCCS) with electronic control for travel control
- Palm Command Control System (PCCS) with EPC for blade control
- Power turn with counter rotation
- Pullhook, front
- Radiator guard grid
- Radiator reserve tank
- Real-time DEF monitoring
- Rear-hinged radiator guard
- Reverse travel speed presets

**OPTIONAL EQUIPMENT**

- Dozer assembly
- Hitch
