PROJECT PROFILE:

Stormwater Infiltration

PROJECT NAME: Golden Bear Distribution Center
PRODUCT USED: 5'- 8" DoubleTrap®
TOTAL WATER STORED: 193,836 cubic feet
LOCATION: Rialto, CA

PROJECT DESCRIPTION:

A new distribution warehouse was being developed in the town of Rialto, California. Due to the size of the project and the local stormwater regulations, designers needed to provide a significant amount of water storage on-site without sacrificing valuable space essential to the warehouse transit operations. StormTrap was chosen for its efficient shape, structural integrity, and lower installed cost compared to other systems.
